#INTERCEPTOR650

Royal Enfield has created my perfect motorcycle.

DAILY MIRROR, UK

Holy wow!
That's a game changer.

OVERDRIVE, INDIA

Makes you feel good about life,
the universe and everything.

BIKE, UK

The INT 650 has got a combination of retro-cool authenticity and modern-day approachability. One of the game changers the motorcycle industry needs right now.

CYCLE WORLD, USA

INTERCEPTOR →

In the 1960s, a hundred feet below the surface of the British countryside, a few men gathered in an underground factory to develop a machine that would change the story of Royal Enfield. A twin-engined, thunder-hearted 750cc roadster that emerged from England, called the Interceptor 750 and was named after the fastest thing in the skies back in the day: the English Electric Lightning Interceptor Jet Fighter. It spent the next decade cruising down the Californian coast, soon becoming a cultural icon.

Inspired by the Interceptor 750 from the 1960s, the Interceptor 650 rides with equal ease through twisty back roads, highways or the urban jungle, bringing together retro style and modern performance. The upgraded 2023 edition, which comes in two striking blacked-out versions and a series of updated colourways, features new functional upgrades like an LED headlamp, tubeless tyres, USB charging, gloss black aluminum switch cubes, adjustable levers, improved grips, cast alloy wheels* and more.

WATCH THE FILM

*Only on the blacked-out variant.

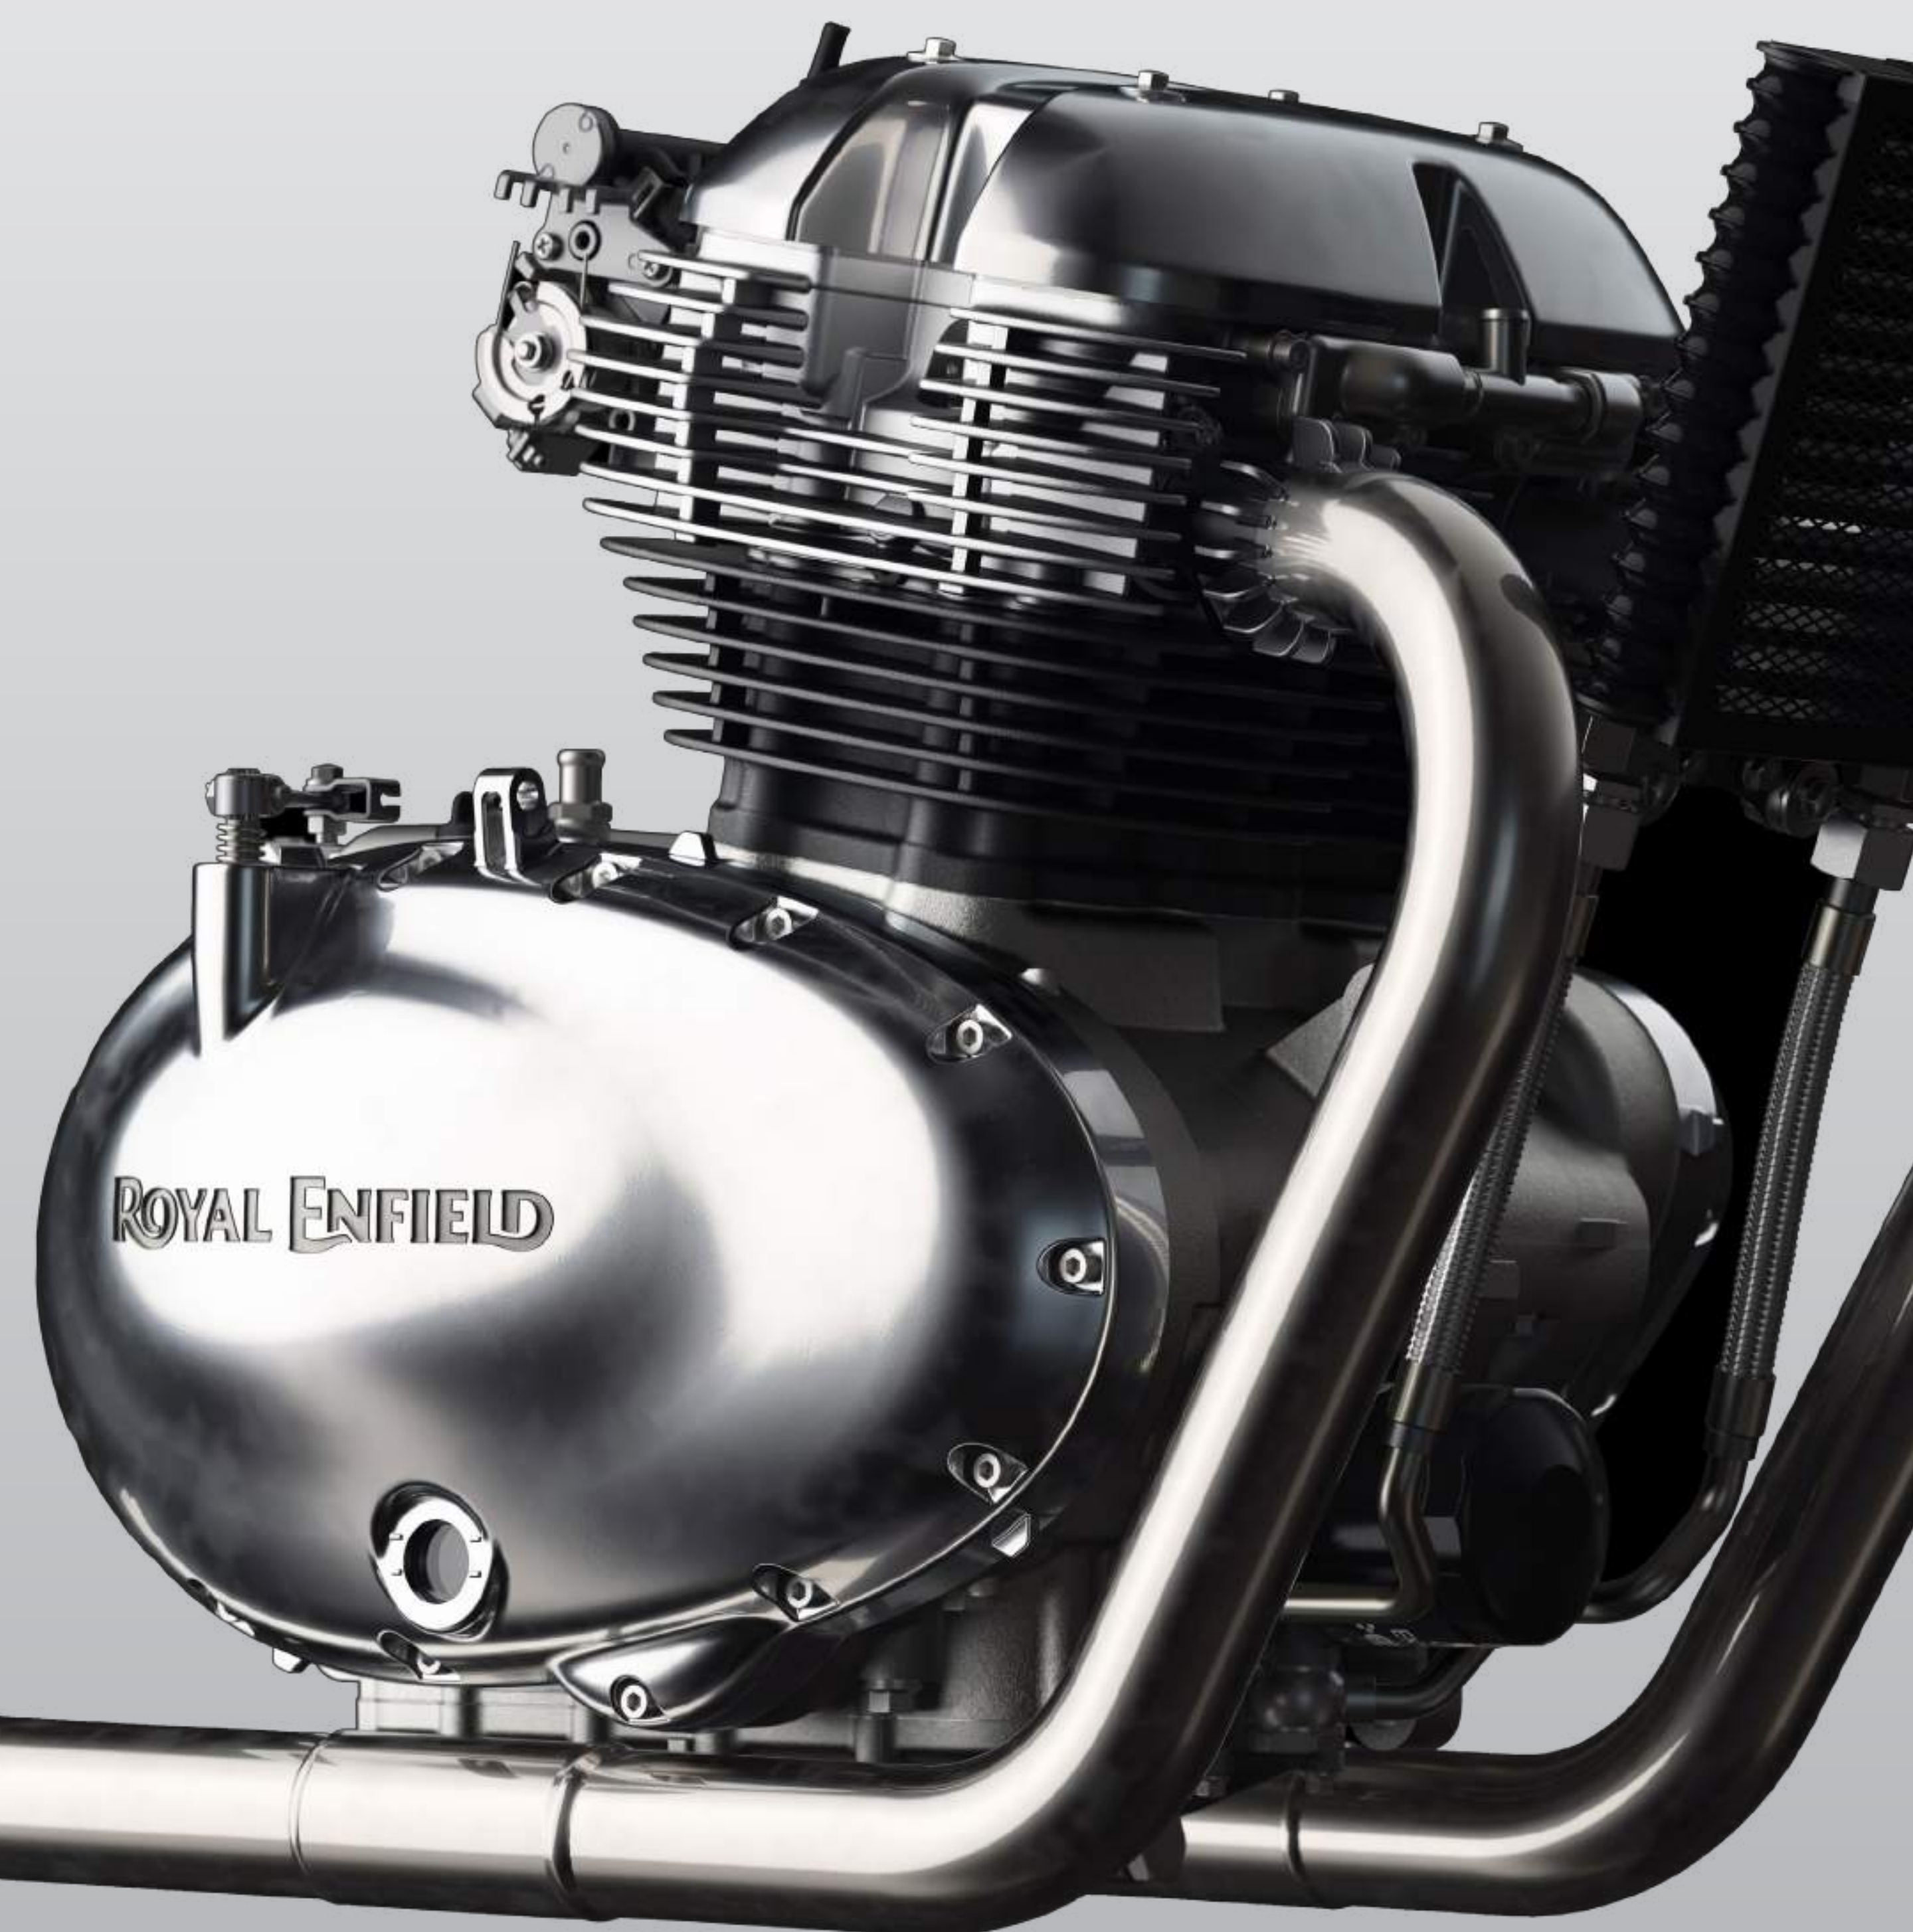

SMOOTH OPERATOR SMOOTH OPERATION

The Interceptor 650's wide handlebar, low seat height and confidence-inspiring riding position have been engineered for comfort with a gentle sports bias. Together, they help the rider make the most of the agile chassis and stay connected to the machine. With a 24-degree rake angle and 106 mm of trail, the motorcycle feels nimble in the city, planted on the highways and confident on the twisties.

**64000
04000**

The Interceptor 650 is powered by Royal Enfield's legendary parallel twin cylinder engine, in an air/oil-cooled configuration and with a 270-degree firing order for a exhaust rumble that truly moves the soul. The 648cc engine offers 34.9 kW at 7250 RPM and a maximum of 52.3 Nm of torque at 5150 RPM. A smooth throttle response throughout the rev range along with a slipper clutch ensures apt power to make light work of the city traffic or cruise effortlessly along the open roads.

BLACKED OUT BLACKED OUT

The all-new, all-black Interceptor 650 variant features a blacked-out engine and exhausts, cast alloy wheels with tubeless tyres and an LED headlamp that seamlessly fuse with the aesthetics of the motorcycle for a look that is guaranteed to make hearts race and heads turn.
